[rattibha.com](#)

لمختصي #الامن_السيبراني
في هذه التغريدة سوف نجمع اغلب المواقع التي تقدم
اختبار لمهاراتك في الاختراق
اغلب هذه المواقع هي تحدي اختراق او انظمه وهميه
وتطبيقات ومواقع مصرح العمل عليها دون اي مسأله
قانونية

اصبح لابد لك ان تحمي سيرفرك اول ومن ثم تحاول
اختراق السيرفر الاخر

نبدأ

موقع RootMe
اكثر من 50 بيئة و منصة مختلفة لتجربة مهارتك في
الحماية و الإختراق

[/https://www.root-me.org](https://www.root-me.org)

[J'ai déjà un compte](#)

Une plateforme rapide, accessible et réaliste
pour tester vos compétences en hacking.
la root est longue mais la voie est Libre

Wargames

The wargames offered by the OverTheWire community can help you to learn and practice security concepts in the form of fun-filled games. To find out more about a certain wargame, just visit its page linked from the menu on the left.

If you have a problem, a question or a suggestion, you can join us via chat.

Suggested order to play the games in

1. Bandit
2. Leviathan or Natas or Krypton
3. Narnia
4. Behemoth
5. Utumno
6. Maze
7. ...

Each shell game has its own SSH port

Information about how to connect to each game using SSH, is provided in the top left corner of the page. Keep in mind that every game uses a different SSH port.

موقع Hacking Lab

يقدم لك مختبر اختراق جاهز للبدء في تحديات الحماية
الخاص بك ، ايضا يقدم الموقع تحدي CTF

<https://www.hacking-lab.com/index.html>

موقع PWNable

المواقع لا يتيح لك تحديات CTF بل يتيح لك فقط تحديات ال PWN وهو اشبه باختراق موقع او حاسوب او نظام من اجل التحكم الكامل فيه

/http://pwnable.kr

Sh3ll we play a game?

per Mario World Credits Warp Explained

موقع IO

ليس بموقع للمبتدئين على كل حال ، إذ انه فور الدخول الى رابط الموقع ستجد انه يطلب منك الإتصال بSSH من أجل الدخول وإستعراض التحديات المطروحة

[/http://io.netgarage.org](http://io.netgarage.org)

Information

This is the frontpage of the IO wargame. IO is our most mature game, but is never the less in continually updated as technology develops. We provide recent radare2 and gdb builds.

IO has sparked several children:

- [io64](#): x86_64 specific
- [ioarm](#): ARMv7
- [IO07](#): testing ground

Connection Details

You have to use an ssh client to connect to the game.

```
ssh level1@io.netgarage.org
password: level1
```

You can have a quick look around using a [web terminal](#)

For historical reasons our services are also reachable on port 2224 (ssh), 84(http).

Need Assistance

You can find help and guidance on our irc channel: #io. Connect to our irc network over at irc2.netgarage.org . Even if you don't need our help, you are welcome to drop by and socialize.

Tags

After solving a level you can add a piece of text to the *tags file*. This file shows up on this webpage, using the links below. Feel free to be somewhat creative. However keep it civil, we do not want to have to police these files. It's probably a good idea to disable javascript when browsing the links below!

APFEL	OFFLINE	#apfel	s0ttle
BLACKBOX	ONLINE	#blackbox	dusty
BLOWFISH	ONLINE	#blowfish	l3thal
CTF	OFFLINE	#ctf	staff
LOGIC	ONLINE	#logic	mh/level
TUX	ONLINE	#tux	staff

Posting solutions to wargame levels on the internet defeats the purpose. Don't spoil it for others.

موقع MicroCorruption

يمكنك من تطبيق مهاراتك في هذا المجال و اجتياز مراحل
متعددة ، يختص الموقع كثيرا في نمط CTF و ايضا
الهندسة العكسية

<https://microcorruption.com/login>

Embedded Security CTF

Scattered throughout the world in locked warehouses are briefcases filled with Cy Yombinator bearer bonds that could be worth billions comma billions of dollars. You will help steal the briefcases.

Cy Yombinator has cleverly protected the warehouses with Lockitall electronic lock devices. Lockitall locks are unlockable with an app. We've positioned operatives near each warehouse; each is waiting for you to successfully unlock the warehouse by tricking out the locks.

The Lockitall devices work by accepting Bluetooth connections from the Lockitall LockIT Pro app. We've done the hard work for you: we spent \$15,000 on a development kit that includes remote controlled locks for you to practice on, and reverse engineered enough of it to build a primitive debugger.

Using the debugger, you'll be able to single step the lock code, set breakpoints, and examine memory on your own test instance of the lock. You'll use the debugger to find an input that unlocks the test lock, and then replay it to a real lock.

Should be a milk run. Good luck. We'll see you on a beach in St Tropez once you're done.

Challenges
Ranking

Welcome on W3Challs

Welcome Pwnerz!

Our community offers you security challenges to learn and practice hacking. Our goal is to provide fun and unique challenges running in a real world environment, with **no guessing** and **no simulation**!

Our challenges address several subsets of hacking, mostly oriented on the offensive. A multitude of technologies and architectures are waiting for you. Show us your mad skills and pop some shells (or calcs)!

What's the goal?

To solve a challenge you have to find a "flag", which is a secret that you can only read after exploiting a vulnerability. Flags may be stored in files, in a database, etc. They are usually surrounded by a `W3C(flag here)` tag so you can hardly miss them!

Where do I start?

Levels are progressive and will (hopefully) meet the expectations from both beginners and experienced hackers and CTF players. Note that this is a challenge site, not a tutorial! We won't hold your hand, but if you made your research and got really stuck along the way, we'll gladly help!

Exploit Exercices موقع

موقع يوفر لك مجموعة من الأجهزة الوهمية و التي يطلب منك إختراقها في تحدياته المتعددة

/https://exploit-exercises.lains.space

Exploit Exercises
Exercises
Download
Blog

Welcome

exploit-exercises.com provides a variety of virtual machines, documentation and challenges that can be used to learn about a variety of computer security issues such as privilege escalation, vulnerability analysis, exploit development, debugging, reverse engineering, and general cyber security issues.

Nebula

Nebula covers a variety of simple and intermediate challenges that cover Linux privilege escalation, common scripting language issues, and file system race conditions. Nebula is an ideal place to get started for people new to Linux exploitation.

[Learn more »](#)

Protostar

Protostar introduces basic memory corruption issues such as buffer overflows, format strings and heap exploitation under "old-style" Linux system that does not have any form of modern exploit mitigation systems enabled. Protostar is the next progression from Nebula.

[Learn more »](#)

Fusion

Fusion continues the memory corruption, format strings and heap exploitation but this time focusing on more advanced scenarios and modern protection systems. Fusion is the place to start if you are familiar with Linux exploitation and wish to learn more about exploitation prevention systems.

[Learn more »](#)

Main Sequence

Main Sequence is the Capture The Flag event from Ruxcon 2012. It provides a variety of challenges such as penetration tool usage, binary analysis, basic cryptographic analysis, client side exploitation, password cracking and general website hacking.

[Learn more »](#)

Cloud Road

Cloud Road is the Capture The Flag event from Ruxcon 2014. Play as an agent for the underground CloudRoad corporation. Compromise web applications, reverse engineer binaries, write exploits, decipher obfuscated messages, and more!

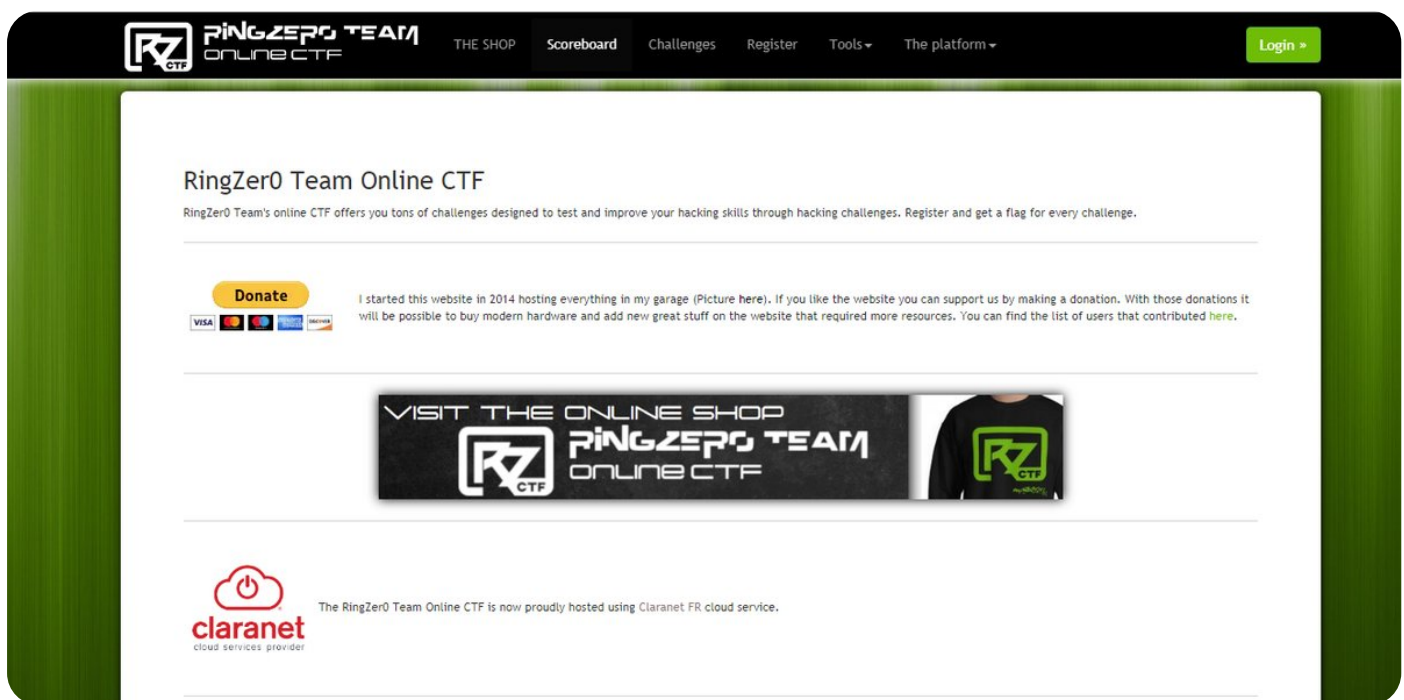

[Learn more »](#)

A few HBH Updates

We have pushed some fixes out to some of the broken challenges.

Real7 is now back online!

Please check the status page before asking if a challenge is down.

We will have some big news about HBH coming soon, if you want to help out with beta testing this big news please let rex_mundi know so we can add you to the list.

Computer News

Consensual Cookies: When No Really Means Yes.

One of the most visible manifestations of the EU General Data Protection Regulations (GDPR) is the cookie banner that pops up when you visit many sites for the first time. These are designed to give visitors the opportunity to decide whether they want to be tracked, and if so by whom.

Any business operating Internet sites in the EU should theoretically use them or something similar, or risk a GDPR fine of up to 4% of global turnover. Cookie banners may be tiresome, but at least they give users some measure of control over how much they are tracked online. But do they?

موقع Try2Hack

يقدم لك مجموعة من المهام الخاصة بالحماية وتزداد المهام صعوبة في كل مرة تحل التحدي المطروح امامك

/http://www.try2hack.nl

[HOME] - [NEWS] - [FAQ] - [RULES] - [CHAT] - [CREDITS] - [START!]

TRY2HACK

Welcome to try2hack!

This site provides several security-oriented challenges for your entertainment. It is actually one of the oldest challenge sites still around :)

The challenges are diverse and get progressively harder. Visit [our IRC channel](#) if you have a question or suggestion.

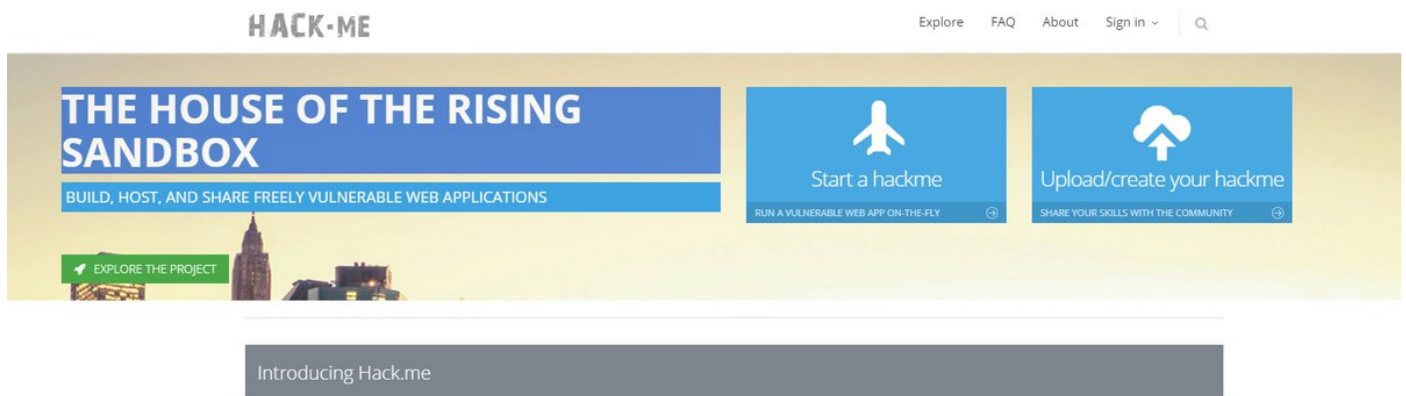

Good luck and have fun!

-raphidae

[/http://Hack.Me](http://Hack.Me) <https://hack.me>

Hack.me is a FREE, community based project powered by eLearnSecurity.
The community can build, host and share vulnerable web application code for educational and research purposes.
It aims to be the largest collection of "runnable" vulnerable web applications, code samples and CMS's online.
The platform is available without any restriction to any party interested in Web Application Security:

- ★ students
- ★ universities
- ★ researchers
- ★ penetration testers
- ★ web developers

موقع HackThis

يحتوي على مجموعة هائلة من المستويات ، و هو أيضا
يشتغل بمبدأ النقاط ، إذ سيتوجب عليك جمع النقاط في
كل مرحلة من المستويات المتعددة من أجل الوصول الى
مستويات أعلى

?Have you ever wanted to learn how to hack

Since 2003, Enigma Group has been providing its members a legal and safe security resource where they can develop their pen-testing skills on various challenges provided by this site

These challenges cover the exploits listed in the OWASP Top 10 Project and teach members the many other types of exploits that are found in today's applications; thus, helping them to become better programmers in the mean time

.By knowing your enemy, you can defeat your enemy
